Button

One seamless unibody, hygienic by design

Experience unmatched durability and elegance with the Medit i900 classic's unibody construction. By eliminating assembly seams, it remains pristine and resists dirt and disinfectants. Engineered to reduce cross-contamination, its seamless design not only prioritizes safety but also delivers perfect weight distribution for effortless handling.

Compact & lightweight

MEDIT

Plug-and-play scanning, scan longer with ease.

Designed for effortless mobility, the MEDIT i900 classic weighs just 165g—lighter than your smartphone—and feels almost weightless in your hand. With its plug-and-play design and newly enhanced, ultra-reliable cable, this scanner delivers seamless performance every time. Embrace a scanning experience where power meets unparalleled freedom, transforming every session into a breeze.

New 3rd-gen optical engine

MEDIT

The new 3rd-gen optical engine drives our dual optical camera system, delivering unprecedented clarity and precision. This breakthrough technology enhances metal scanning performance and captures richer textures, ensuring every scan is detailed and accurate. With deeper scanning depth and improved image quality, our advanced optical solution redefines digital dentistry, setting a new benchmark in precision and performance.

MEDIT i700

Dual optical cameras

MEDIT

Double the clarity, twice the precision.

Challenge reflective metals and navigate the varied environments of the oral cavity with ease. Our advanced technology ensures enhanced image quality and accuracy, turning once-difficult scans into seamless, precise results every time.

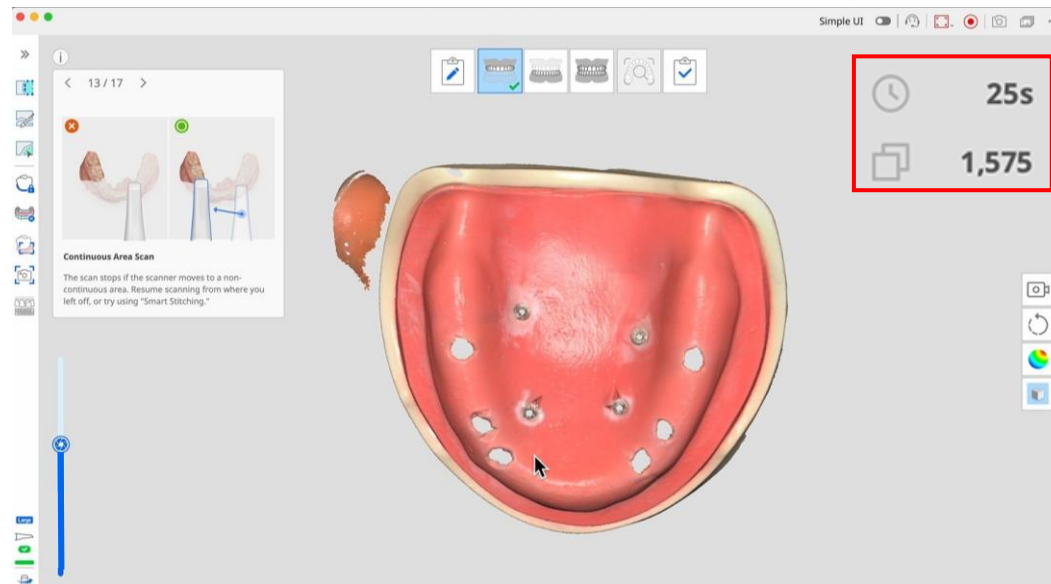

With the capability to scan in tighter and deeper spaces with remarkable accuracy, our scanner provides unparalleled performance, ensuring that every detail is captured with the utmost clarity.

Capture more, faster

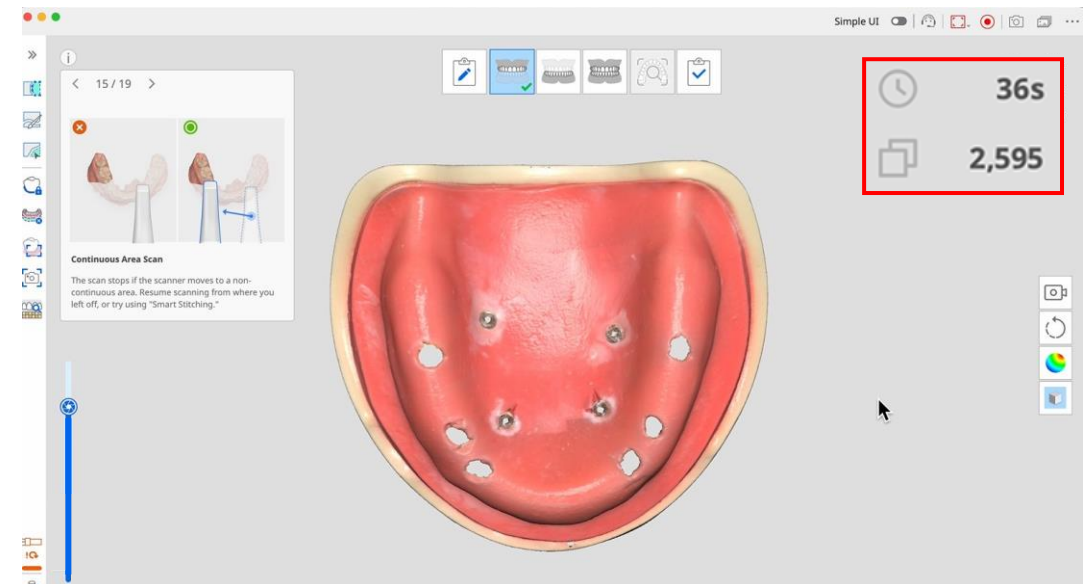

MEDIT

Embracing a larger scanning area, the MEDIT i900 classic efficiently captures extensive data, reducing both scan time and processing duration. Unlike other products that may suffer data interruptions based on the scan path, the MEDIT i900 operates smoothly and rapidly—even with challenging edentulous models. It transcends conventional limitations, ensuring every scan is continuous, coherent, and a testament to exceptional performance.

Easy for beginners with AI Scan Assist

MEDIT

Effortless Scanning with the Reliability Map Feature

Our innovative Reliability Map feature provides real-time precision checks during scanning. It identifies missing spots and displays arrows to guide you. Optimal scan areas turn greener, ensuring reliable results every time.

Not just accessories

3 Types of Tips Available

Medium Tips

A versatile choice, offering the perfect balance of coverage and control for everyday scanning.

Small Tips

Designed for precision in tight spaces, ensuring comfort and accuracy when scanning smaller arches or hard-to-reach areas.

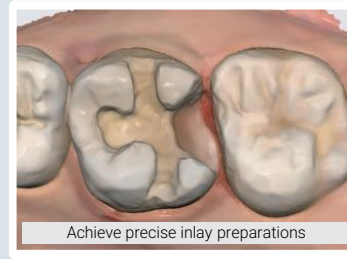

Large Tips

Capture more in less time—maximize scan efficiency and scan edentulous spaces with ease.

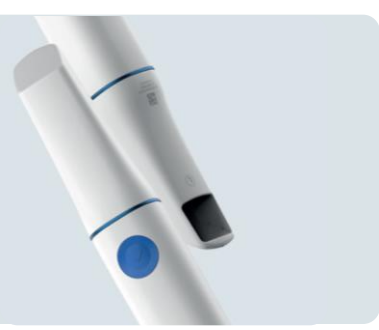

Dual optical cameras

- New 3rd-gen optical engine
- Improved metal scanning
- Enhanced texture quality

One seamless unibody

- Hygienic and easy to clean
- Durable and innovative interface
- Enhanced response performance
